

Joint sequence and structural correspondence: reference-distance direction sensitivity

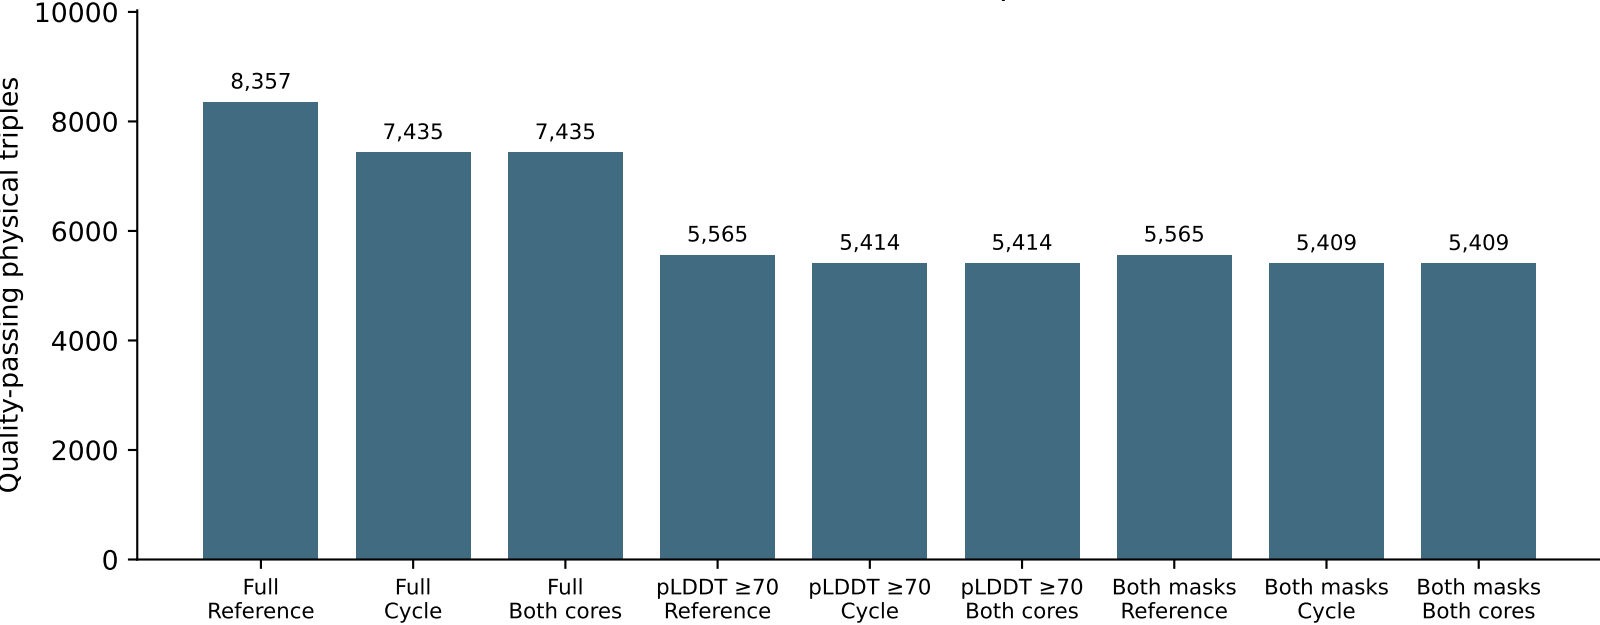

FAMSA + structural correspondence

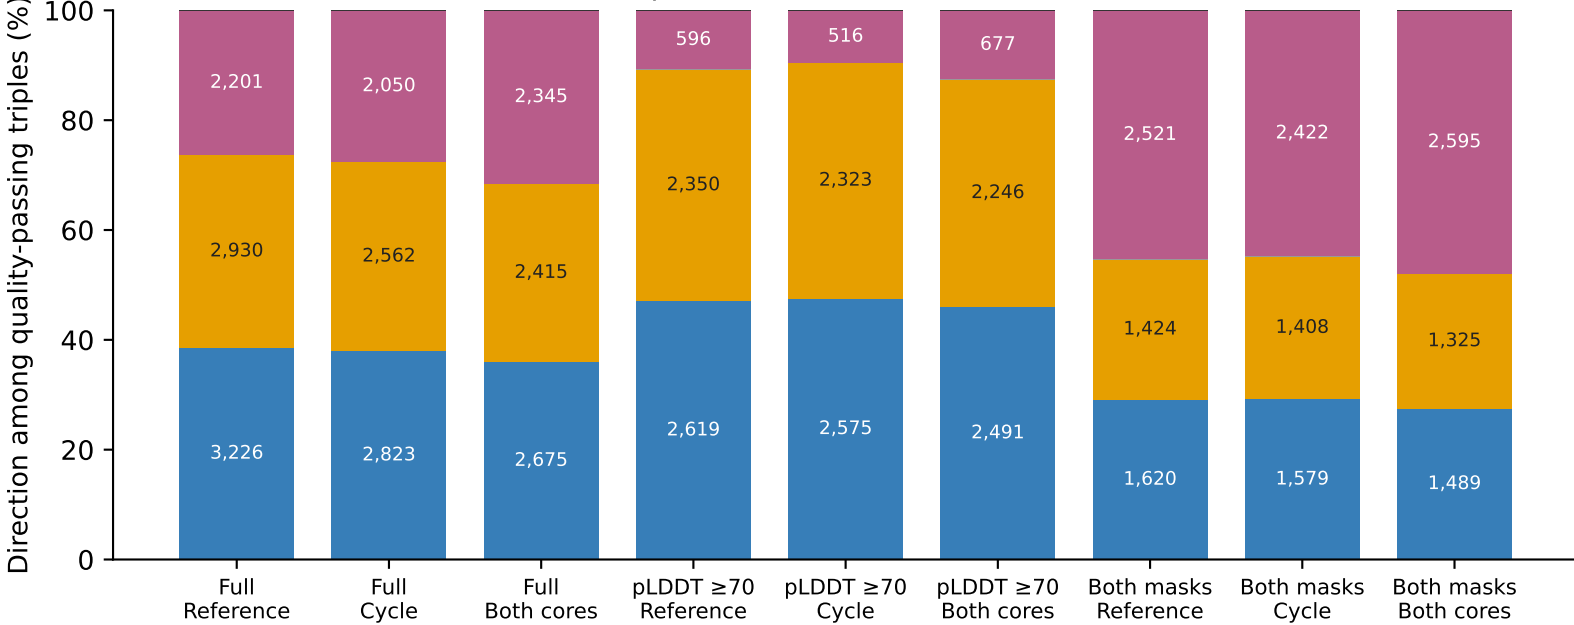

All selected correspondence, mask, core and order alternatives

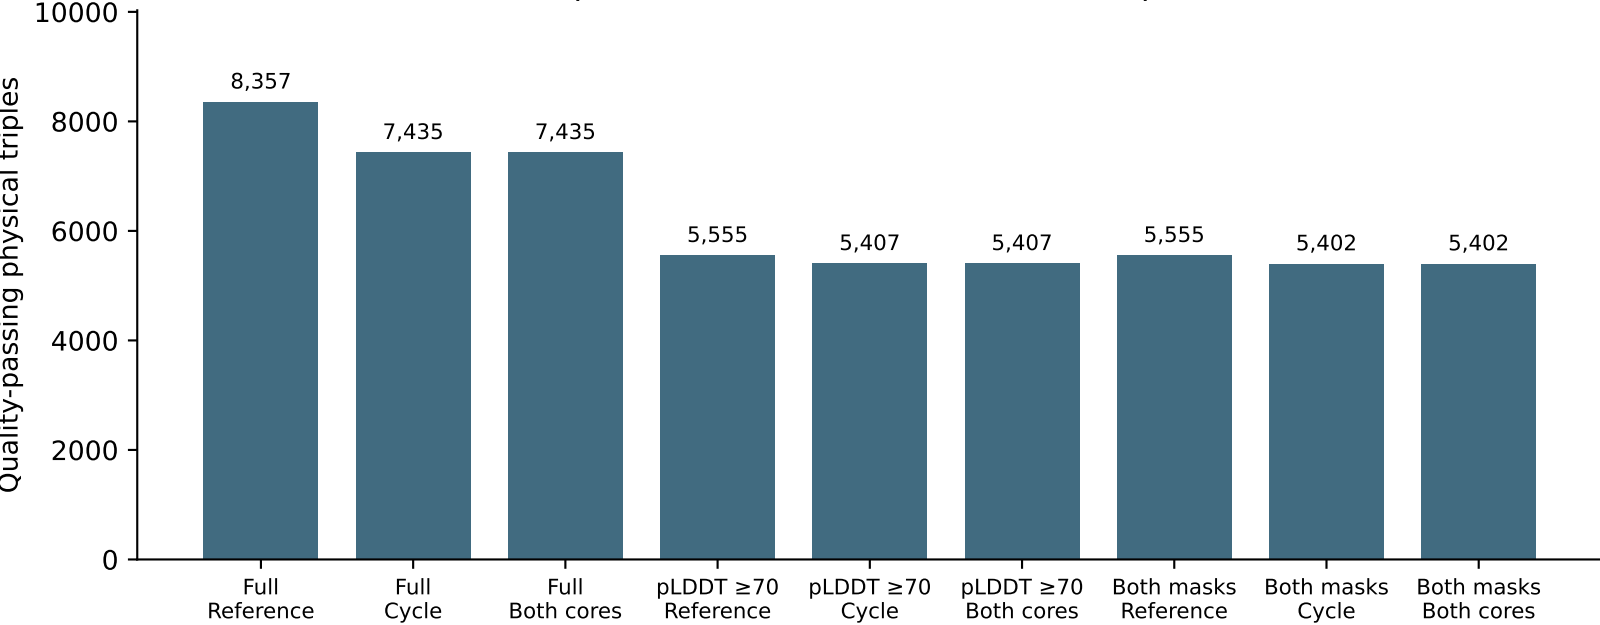

MAFFT + structural correspondence

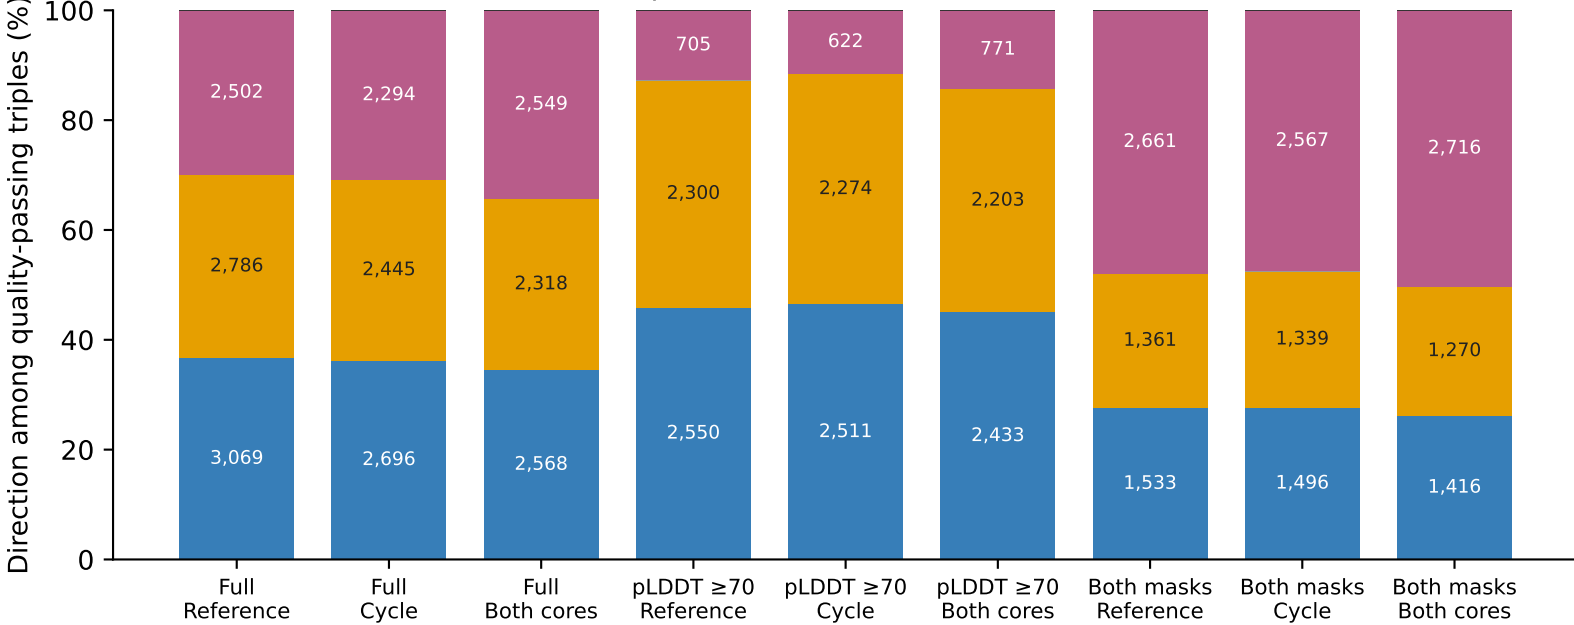

All selected correspondence, mask, core and order alternatives

Both sequence methods + structural correspondence

All selected correspondence, mask, core and order alternatives

Positive Negative Sign uncertain Within numerical tolerance Unavailable Nonunique fit

≥50 residues; ≥70% of each original protein. RMSD(A, reference) – RMSD(B, reference). Dependent alternatives; no evolutionary polarity or confidence interval.
