

Close matches represent a selected target subset

S45 · strict background set · factor-1.5 sequence distance · moderate metadata tolerances · alignment-E-value policy
11,917 matched targets across 143 taxa per guide; original pools: 109,245 profile / 109,228 mafft targets.
Descriptive standardized differences, not effects or confidence intervals. Positive-log distance excludes 1,447 zero-distance pairs.
