

Recovered ancestral first-horizon diagnostics: 403 completed four-chain groups

No group passes every scalar or candidate-length screen

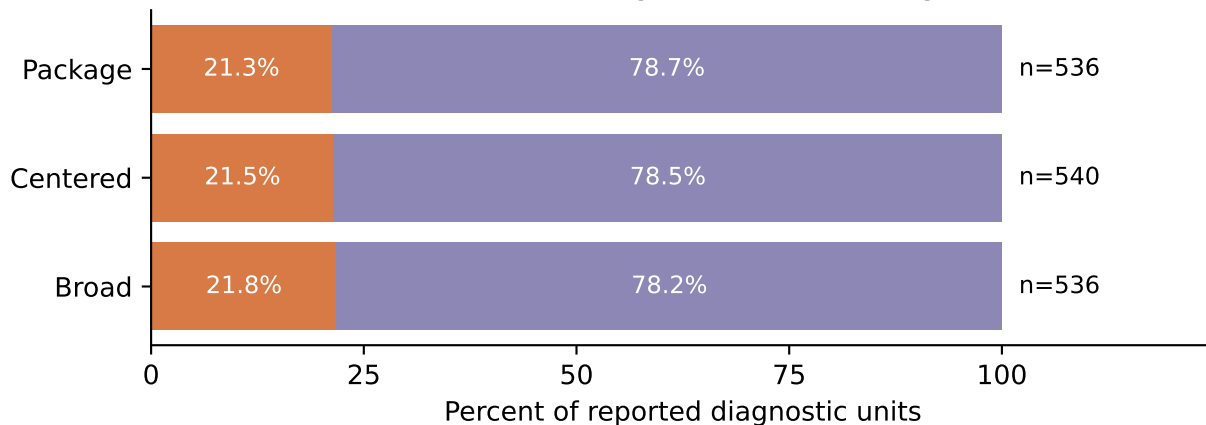

Scalar variables / discard through 250

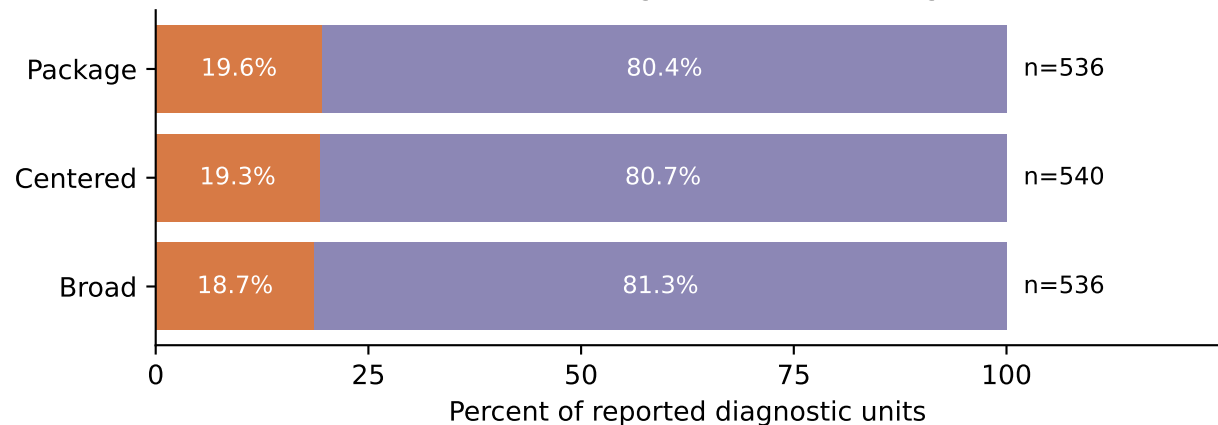

Scalar variables / discard through 500

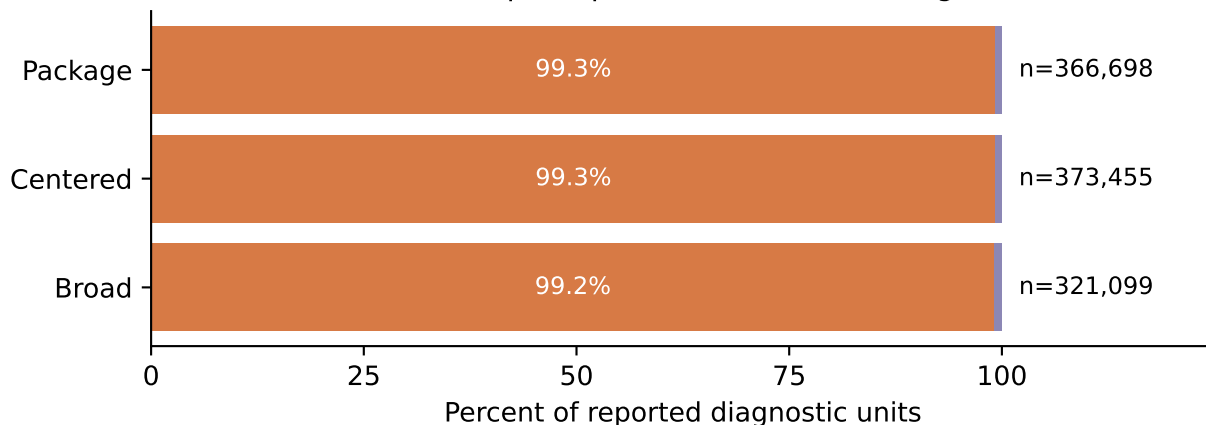

Candidate-node lengths / discard through 250

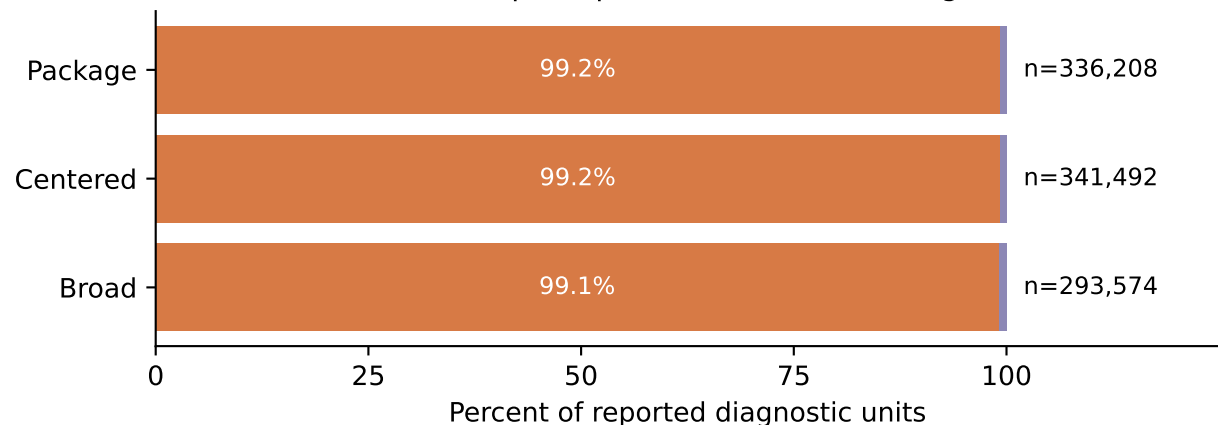

Candidate-node lengths / discard through 500

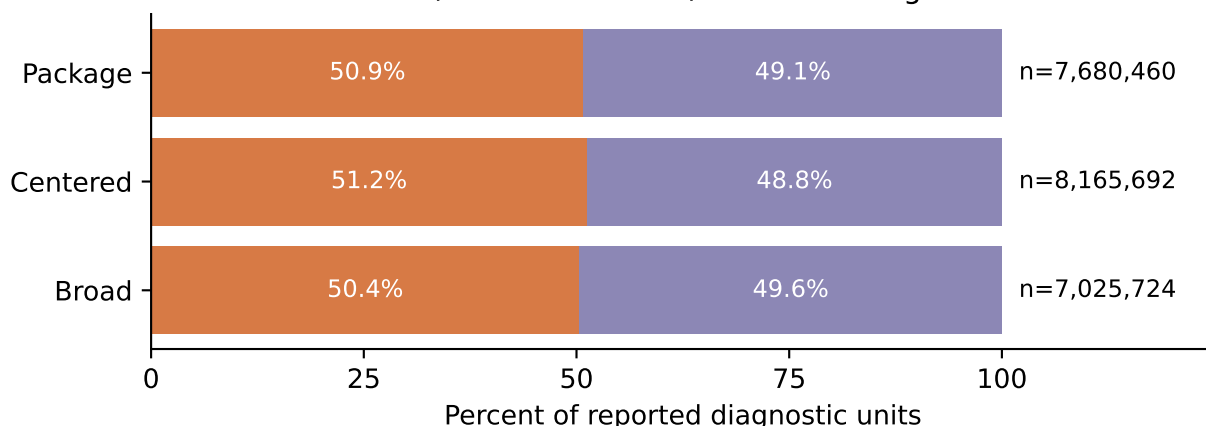

Distinct temporal patterns / discard through 250

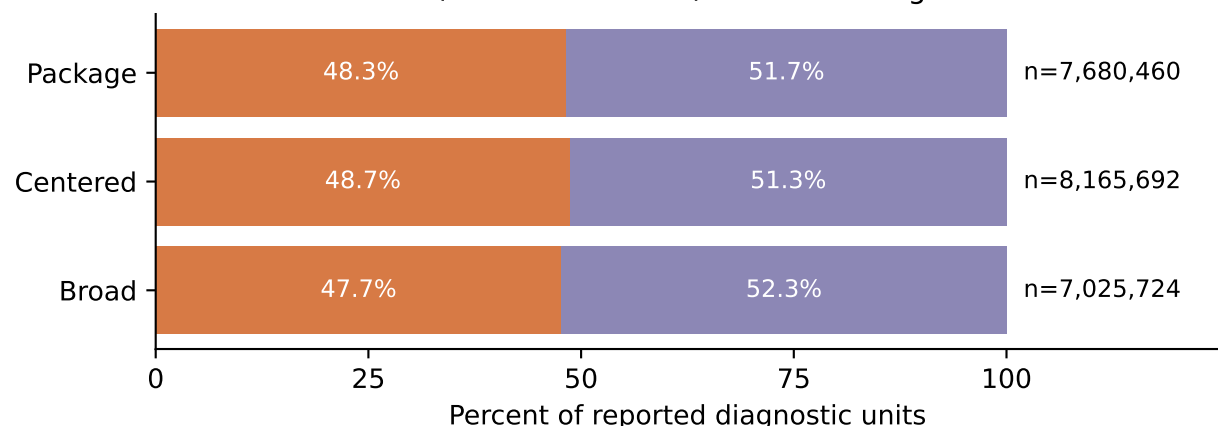

Distinct temporal patterns / discard through 500

Node/residue anchors / discard through 250

Node/residue anchors / discard through 500

■ Passes marginal screen only
■ Mixing requires review
■ Constant/no observed variation; review

Two native memory-failed groups retained in the full table. Units are dependent; constant states do not establish convergence.
